

# OPTIONS FOR GREENHOUSE GAS (GHG) EMISSIONS REDUCTION IN THE BC GREENHOUSE INDUSTRY

## Complete Report Request

The 'Options For Greenhouse Gas (GHG) Emissions Reduction In The BC Greenhouse Industry' report is the result of a combined effort by the BC Greenhouse Growers' Association (BCGGA), the United Flower Growers Cooperative Association (UFGCA), the BC Landscape and Nursery Association (BCLNA), and Clean BC.

The project was coordinated by a joint Steering Committee comprised of industry growers, their Associations, Government representatives and representation from the consultant group.

### The authors of the report are:

Consolidated Management Consultants Ltd.  
Quantum Lighting  
SES Consulting

The full version of the report is an in-depth comprehensive exploration (as of November 2023) of all possible technologies whether they are available, economically affordable, applicable today or possibly in the future. The report you have requested is the complete report. There is also a summary report that includes the projects that have been deemed by the Steering Committee to be of more immediate interest, further research and exploration.

The full version of the report is available on request, and we ask that individuals receiving it acknowledge that they have read this introduction and understand the differences between the summary report and the complete report.

I \_\_\_\_\_, of (affiliation) \_\_\_\_\_  
have requested a full version of the following report:

### ***"Options For Greenhouse Gas (GHG) Emissions Reduction In The BC Greenhouse Industry"***

I understand that this is a complete exploratory document, and it includes solutions that may not be economically or technically feasible for the BC Greenhouse Sector at this time.

I further acknowledge that I will not share or distribute the full version of the report without those recipients first completing and submitting this form to the BCGGA, UFGCA and the BCLNA for approval.
